

## All Functionalities

### Unique Sprockler characteristics

- 👤 Special questions types, including bipoles, tripoles and picture pointers to allow for intuitive and nuanced replies
- 👤 Getting voices heard by using storytelling principles and self-interpretation of stories, for maximal authenticity and ownership
- 👤 Integrated data collection and visualisation, which enables real-time response monitoring, and viewing of emerging response patterns
- 👤 Live sessions for both data collection and visualisation, for collective interpretation and decision-making in one event
- 👤 Encrypted data storage on (mobile) device, during transfer and server storage for maximal data privacy and security
- 👤 Fully secure data collection in remote areas or non-internet zones with the Sprockler app
- 👤 Developed by practitioners with a focus on applicability and user-friendliness
- 👤 Entirely compatible with philosophies/methodologies such as outcome harvesting, appreciative inquiry, most significant change a.o.

## DESIGNER

### Question types

- Descriptive text
- Open question
- Single choice
- Multiple choice
- Bipole
- Tripole
- Picture Pointer
- Numeric question

### Inquiry options

- Change the order of the questions
- Add custom logo
- Translate the inquiry in multiple languages
- Test an inquiry
- Clone an inquiry
- Delete an inquiry
- Activate an inquiry
- Finish an inquiry
- Yaml Editor

### Question options

- Name each question
- Add illustrations
- Group questions together on a page
- Ask interviewer questions
- Use exclusion logic
- Make questions required
- Allow not applicable
- Fill in Other
- Randomise choices in multiple choice
- Storage tag (in cohort studies)

## COLLECTOR

### Modes

- Use test mode
- Use personal mode for 1 respondent
- Use interviewer mode for interviews

### Invitations

- Send personalised emails to participants
- Send personalised emails to interviewers
- Send anonymous reminders

### Android and IOS app

- Interview respondents
- Change language during the inquiry
- Store responses to questions
- Update the inquiries
- Run multiple inquiries at the same time
- Runs offline
- Upload responses later
- Reset response counter
- Start over in an inquiry
- Delete inquiry
- Delete unsubmitted responses

### Web collector

- URL link to invite participants
- Interview respondents
- Change language during the inquiry

### Results

- Visibility of participation mode
- Visibility of submission date
- Visibility of mode of collection
- Download data in CSV
- Download data in Excel
- Download media
- Dashboard with participation counter
- Quick scan of results

### Data management

- Exclude responses (if test or no consent)
- Include test responses
- Edit responses (marked as non-original)
- Provide translations to text responses
- Transcribe audio files
- Import data sets to add data
- Check audio and video recordings

## VISUALIZER

### Report settings

- Change report name
- Set report language
- Use different languages
- Refresh new data
- Publish report
- Create custom link
- Use password protection
- Create custom password
- Make report hidden
- Change default colour scheme
- Edit colour scheme
- Edit report styling (CSS)
- Add custom colour scheme
- Select default colour classifier
- Select default stories (click on dot)
- Select default pop-up answers (mouse-over)

- Filter responses by question
- Filter responses by submission date
- Clone report
- Duplicate questions
- Change report item order

### Report viewer

- Presentation mode
- Download all visuals
- Click on dots to show story behind it
- Follow groups of dots
- Follow all responses to one classifier
- Change report item order

### Report item settings

- Change visibility report items
- Change titles questions
- Change colour classifier per question
- Change story to show (click on dot) per question
- Change pop-up answer (mouse over) per question
- Change language per question
- Hide box frame
- Change graph type

### Graph types

- Open question: Word cloud or response texts
- Single choice: Multi-dot or pie-chart
- Multiple choice: Multi-dot or pie-chart
- Bipole: bipole graph or stacked dot plot
- Tripole
- Picture Pointer
- Numeric question

### Add items

- Bubble (bipole matrix)
- Add descriptive text
- Add images
- Add title
- Add separator lines
- Add spacers
- Add quotes
- Add link buttons
- Add numeric item
- Adjust graph sizes
- Adjust graph titles

## SECURITY & SUPPORT

### Security and privacy

- Encrypted storage on mobile device by the app
- Encrypted data transfer to the server
- Encrypted data storage
- Https – certificate
- Exclude text responses without consent
- Edit text responses without consent

### Support

- Support manual
- Example inquiries
- Example cases
- Database of bipoles and tripoles
- FAQ
- Available consultancy

Check the [Sprockler manual](#) for extensive descriptions of each Sprockler feature and functionality.
